K5600xmc - Kinetic Plasma Cutting & Plate Cutting The K5600xmc plasma cutting system combines all of the features and specifications of our innovative K5000 system but with the addition of our Plate Dragga pass-through table technology. This means that instead of a traditional moving gantry, the material is pulled through a stationary gantry for cutting, drilling, marking and more. [cutting equipment - Plasma Cutting Machines](#)

The Best Plasma Cutting Equipment at the Best Prices. Welders Supply Company offers name-brand, professional-grade plasma cutting equipment, including Miller plasma cutters, Hypertherm plasma cutters, Motor Guard and Sellstrom plasma-cutting equipment.

Plasma Cutting Basics | Lincoln Electric Canada

Plasma cutting really shines in some niche applications, such as cutting expanded metal, something that is nearly impossible with oxyfuel. And, compared to mechanical mean of cutting, plasma cutting is typically much faster, and can easily make non-linear cuts.

Plasma cutting - Wikipedia

Plasma cutting is a process that cuts through electrically conductive materials by means of an accelerated jet of hot plasma. Typical materials cut with a plasma torch include steel, stainless steel, aluminum, brass and copper, although other conductive metals may be cut as well.
