The current MEP systems design approach for super-tall buildings must consider smaller vertical zones to manage the imposed system pressures and efficiently adapt to occupancy requirements. Smaller zones distribute and isolate the pressure. At some future date, new technologies or innovations will need to be developed to support the construction of the next super-tall building. The challenge: Tall and super-tall buildings: HVAC ...
CSE: What unique HVAC requirements do tall/super-high-rise structures have that you wouldn't encounter on other structures? Jalayerian: Super-tall developments offer energy reduction opportunities for HVAC systems associated with air conditioning zones located in higher elevations because higher altitudes offer cooler and less humid outdoor.
