[What is Ductless Air Conditioning? \(with picture\)](#)

Ductless air conditioning is a system of cooling the home without the use of central air duct systems. While this can be achieved using window-mounted units, a more efficient technique involves the use of split system air conditioning units.

[The Pros and Cons of a Ductless Heating and Cooling System ...](#)

A ductless heat pump or air conditioner typically consists of a wall-mounted indoor unit combined with an outside compressor. It's most often used in a situation where a window AC unit or baseboard heating would be considered, such as a new addition to a house.

[Ductless Air Conditioning Systems - Modernize](#)

A ductless air conditioner system works by having a condenser outside that pumps and cools refrigerant through copper lines that lead to an indoor air unit that distributes the cool air with a fan. That's similar to central air (check central air conditioning costs).

[Q&A: What is "split ductless" air conditioning?](#)

Split ductless is a smart way to add air conditioning to a limited number of multiple rooms without having to open up walls to install ductwork as you would with a central-air system or

### Read This Before You Buy Ductless AC | This Old House

Central-air systems send refrigerant to a bulky central air handler that then blows cool air into the house through a network of ducts. Ductless systems pump refrigerant to compact indoor units within individual rooms. Each unit operates like a miniature air handler, delivering cold air into its own zone only when it's needed.
